□ OBJECTIVE 1: School Type, Teaching Quality, and Resources (15 Articles)

1. **Eric A. Hanushek (2003)**
   The Failure of Input-Based Schooling Policies. Economic Journal.
   Found that teacher quality has a stronger impact on student achievement than school funding.
2. **Linda Darling-Hammond (2000)**
   Teacher Quality and Student Achievement. Education Policy Analysis Archives.
   Demonstrated that qualified teachers significantly improve academic performance.
3. **Joshua D. Angrist & Victor Lavy (1999)**
   Class Size and Student Achievement. Quarterly Journal of Economics.
   Smaller class sizes improve learning outcomes.
4. **Alan B. Krueger (1999)**
   Experimental Estimates of Education Production. QJE.
   Found strong effects of reduced class size.
5. **Jaap Scheerens (2004)**
   Review of School Effectiveness Research. UNESCO.
   Identified school climate and resources as key factors. (PMC)
6. **Bert Creemers (1994)**
   Effective Instructional Conditions. International Journal of Educational Research.
   Highlighted teaching practices as crucial.
7. **Peter Sammons (1995)**
   Key Characteristics of Effective Schools.
   Emphasized leadership and teaching quality. (PMC)
8. **Guihua Xie & Yangyang Zhang (2020)**
   School Effectiveness Study. Journal of Chinese Sociology.
   Found school resources and reputation impact performance. (SpringerLink)
9. **Praetorius Anna-Katharina (2018)**
   Teaching Quality Dimensions. ZDM Mathematics Education.
   Identified structure, support, and cognitive activation.
10. **Seidel Tina (2007)**
    Teaching Effectiveness Review.
    Showed teaching practices strongly affect achievement.
11. **Rothstein Jesse (2010)**
    Teacher Quality and Student Achievement.
    Teacher effects persist long-term.
12. **López-Martín Esther (2023)**
    Meta-analysis of Teacher Quality.
    Found strong link between teacher competencies and performance. (Frontiers)

13. **Marder Jens (2023)**
    Classroom Management and Achievement.
    Classroom discipline improves outcomes. (Frontiers)
14. **Canbolat Yusuf (2023)**
    Public vs Private Schools Study.
    Compared organizational structure and achievement. (Sage Journals)
15. **van Klaveren Chris (2011)**
    Teaching Style and Performance. Economics of Education Review.
    Teaching methods influence learning outcomes. (Taylor & Francis Online)

OBJECTIVE 2: Demographic Factors and Study Habits (15 Articles)

1. **James S. Coleman (1966)**
   Equality of Educational Opportunity.
   Socioeconomic status strongly influences performance.
2. **Gary Becker (1993)**
   Human Capital Theory.
   Family investment impacts education.
3. **Barry J. Zimmerman (2002)**
   Self-Regulated Learning.
   Study habits improve achievement.
4. **John Hattie (2009)**
   Visible Learning.
   Study skills and feedback are high-impact factors.
5. **Alexander W. Astin (1993)**
   Student Involvement Theory.
   Engagement predicts success.
6. **Helen F. Ladd (2012)**
   Education and Inequality.
   Income disparities affect outcomes.
7. **Reardon Sean (2011)**
   Income Achievement Gap.
   Economic inequality widens performance gaps.
8. **Sirin Selcuk (2005)**
   SES and Academic Achievement.
   Strong correlation between SES and performance.
9. **Duckworth Angela (2007)**
   Grit and Achievement.
   Persistence predicts academic success.

10. **Credé Marcus (2010)**
    Study Habits Meta-analysis.
    Time management and discipline improve grades.
11. **Pintrich Paul (2004)**
    Motivation and Learning.
    Motivation enhances performance.
12. **Eccles Jacquelynne (2002)**
    Expectancy-Value Theory.
    Beliefs affect academic choices.
13. **Entwisle Doris (2005)**
    Family and School Influence.
    Family background shapes achievement.
14. **Zimmerman Barry (2008)**
    Academic Self-Regulation.
    Self-discipline improves outcomes.
15. **Robbins Steven (2004)**
    Academic Success Factors.
    Combined demographic and behavioral predictors.

□ OBJECTIVE 3: Behavioral and Lifestyle Factors (15 Articles)

1. **Mary A. Carskadon (1998)**
   Sleep and Academic Performance.
   Sleep deprivation lowers performance.
2. **Charles Hillman (2008)**
   Exercise and Brain Function.
   Physical activity improves cognition.
3. **Jean M. Twenge (2017)**
   Digital Media and Performance.
   Screen time negatively affects learning.
4. **Sarah-Jayne Blakemore (2012)**
   Adolescent Brain Development.
   Behavior influences learning.
5. **Daniel F. Chambliss (2014)**
   College Habits Study.
   Daily routines affect success.
6. **Taras Howard (2005)**
   Physical Activity and Achievement.
   Active students perform better.

7. **Fredricks Jennifer (2004)**
   Student Engagement.
   Behavioral engagement improves outcomes.
8. **Eccles Jacquelynne (2003)**
   Extracurricular Activities.
   Participation boosts academic success.
9. **Wentzel Kathryn (1998)**
   Social Behavior and Achievement.
   Positive behavior improves performance.
10. **Bandura Albert (1997)**
    Self-Efficacy Theory.
    Confidence influences academic success.
11. **Duckworth Angela (2016)**
    Self-Control and Success.
    Behavioral discipline matters.
12. **Roeser Robert (2000)**
    Emotional Well-being.
    Mental health impacts achievement.
13. **Steinberg Laurence (2005)**
    Adolescent Risk Behavior.
    Risk behaviors reduce performance.
14. **Wang Ming-Te (2012)**
    Engagement and Achievement.
    Behavioral involvement improves learning.
15. **OECD (2019)**
    PISA Report on Student Well-being.
    Lifestyle and well-being affect outcomes.
